

ASSEMBLY INSTRUCTIONS

SOLAR SYSTEM MODEL

INSTRUCTIONS FOR OUTER PLANETS:

1. Punch out all matching prints for a particular planet.
2. Locate the two largest circles for that planet and slide them together using the middle slot in each. Slide the two pieces all the way together so that you are left with a roughly spherical shape.
3. Slot together the remaining 4 circles into the planet. There is only one way for them to fit and the pieces are interchangeable.

INSTRUCTIONS FOR INNER PLANETS:

1. Punch out all matching prints for a particular planet.
2. Locate the two largest circles for that planet and slide them together using the longer middle slot in each. Slide the two pieces all the way together so that you are left with a roughly spherical shape.
3. Slot together the remaining 2 semi-circles into the planet, along its equator, inserting the tabs through the slots. There is only one way for them to fit and the pieces are interchangeable.
