1. Punch the buoys out from their respective boards.
2. Clip one plastic stand on the bottom of each cutout and arrange on the mat as desired.

Animals & Plants

1. Punch the animals and plants out from their respective boards.
2. Clip one plastic stand on the bottom of each cutout and arrange on the mat as desired.

Underwater Research Station

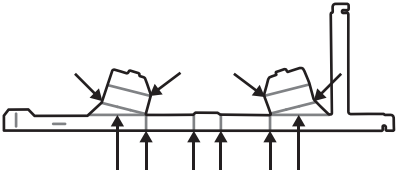

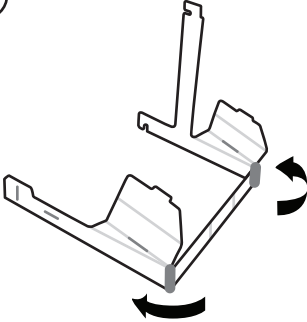

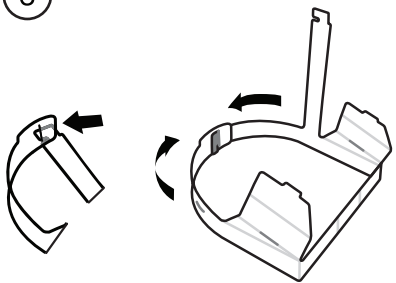

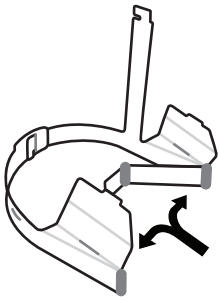

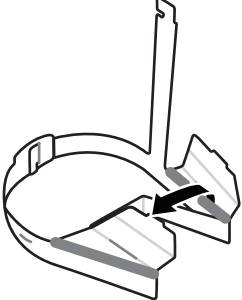

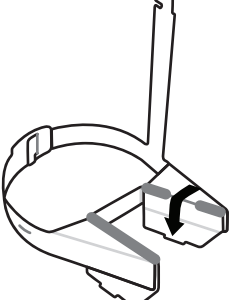

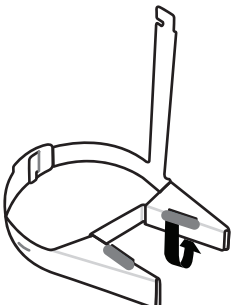

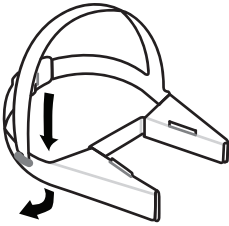

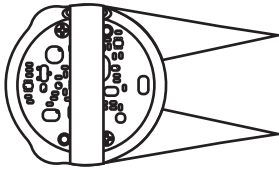

1. Slot the semi-circular base into the five short supports.

Assembly Instructions

Challenge Mat: Ocean Explorer

Arms

<p>①</p>  <p>Begin by making a hard crease along the indicated folds.</p>	<p>②</p>  <p>Bend the front two points to 90 degrees.</p>	<p>③</p>  <p>Rotate the hooked side of the belt up. Hook the two ends of the back belt together.</p>
<p>④</p>  <p>Bend the middle portion of the front inwards.</p>	<p>⑤</p>  <p>Fold over the top covers of the forks.</p>	<p>⑥</p>  <p>Fold the flaps over the inner portion of the forks.</p>
<p>⑦</p>  <p>Double the flap over the inner fork and tuck the tab in through the slot to hold it in place.</p>	<p>⑧</p>  <p>Hook the top strap into the corresponding slot on the other side of the main belt, starting at 90 degrees.</p>	<p>⑨</p>  <p>Place on top of Evo with the pointed ends facing forward. Check that the forks do not drag across the surface while moving. Note: The clear adhesive dots can be used to secure the arms to Evo if needed.</p>
